PROFILE

Data analyst and data scientist turning messy raw data into clear, decision-ready dashboards, models and stories.

I clean up messy tables, build models people can trust, and design dashboards that answer the question before it gets asked. Most of my work sits in the unglamorous part of the job: reconciling exports that disagree, fixing the definitions nobody wrote down, and rebuilding the metrics layer so the numbers mean the same thing on Monday as they did on Friday.

The rest is where it gets fun — modelling demand, sizing experiments, and shipping dashboards that get used daily instead of admired once. I care about clean data contracts, reproducible queries, and charts a stakeholder can read in five seconds without me in the room.

SELECTED WORK

Datelens

PYTHON · FASTAPI · TYPESCRIPT

- Data exploration app that gives a single overview of a dataset instead of a folder of exports.
- Python and FastAPI backend with a TypeScript front end, built and deployed on Vercel.

PixelForge

NODE.JS · TYPESCRIPT

- Image conversion tool that exports an uploaded image in the format you need.
- TypeScript service handling upload, conversion and download end to end.

HOW I WORK

- **Definitions first.** One documented metric layer beats five exports that disagree.
- **Reproducible by default.** Versioned queries and data contracts, so a number can always be traced back.
- **Built to be read.** A dashboard should answer the question in five seconds, without me in the room.

FOCUS

Retail, product and marketing analytics: demand forecasting, experiment sizing, and the metrics layer underneath both. Open to analyst and data scientist roles.

SKILLS

DATA & DATABASES

SQL · Python · PostgreSQL · BigQuery · Snowflake · dbt · Airflow · Spark · Excel

PROGRAMMING

pandas · NumPy · scikit-learn · statsmodels · Polars · FastAPI · Docker · SQLAlchemy

VISUALIZATION

Tableau · Power BI · Looker · Plotly · Streamlit · Metabase

OTHER

Statistics · A/B Testing · Forecasting · dbt Metrics · Git · Agile

BY THE NUMBERS

40+ PROJECTS	**18** DASHBOARDS
2.4B ROWS ANALYSED	**12** DAILY TOOLS
